Subject: NY & NJ Offshore Wind October Environmental Justice Forum Summary
Attachments: NY&NJ_EJF1_Summary_FINAL_11.16.22.pdf

Good Evening,

We are writing to share the Meeting Summary of BOEM's New York & New Jersey Offshore Wind Environmental Justice Forum held on October 26th, 2022. This meeting summary covers the discussion and the materials shared during the Forum, including the presentation. It also includes a list of bulletin announcements collected from participants at the beginning of the Forum.

Thank you to all who were able to join and share your valuable time and thoughtful input. Findings from this forum directly inform and support BOEM's environmental justice and unserved community engagement efforts for the New York Bight Wind Energy Programmatic Environmental Impact Statement.

As always, we encourage feedback on all materials that have been or will be shared in relation to the Forums. We are committed to continuing to jointly develop this space with you all and shape it based on your input. Questions or comments can be sent to environmental.justice@boem.gov.

With that in mind, please save the date for our next Forum on January 25th, 2023 from 10:30 to 12:30pm. We will share more information on that Forum in the upcoming weeks.

Sincerely,

Holly
